Drilling Update

First lateral of Tilbrook horizontal well completed

WestSide Corporation Ltd (ASX code WCL) advises that its Tilbrook #L8b lateral well has successfully intersected the Tilbrook #8 well in ATP 688P. The well provides access to more than 1000 m of coal in the P seam of the Moranbah Coal Measures and is being completed for production testing.

ATP 688P coal seam gas drilling program

WestSide is currently conducting a five-well program in ATP 688P in the northern Bowen Basin. The program includes two exploration wells (Tilbrook #8a and #8b), two core holes (Mount Saint Martin #1 and Bald Hill #1) and a horizontal chevron-style dual-lateral well (Tilbrook #L8a and #L8b) being completed into one existing vertical well (Tilbrook #8).

Latest activity – Tilbrook #L8b

The Tilbrook #L8b well intersected the Tilbrook #8 vertical well at a total depth (length) of 362 m, with 1060 m exposed in the unintruded P seam of the Moranbah Coal Measures. A liner has been installed in the well and it will be suspended for production testing upon completion of the Tilbrook #L8a lateral well.

The rig is planning to mobilise to the second lateral well Tilbrook #L8a on 11 June.

Lucas Mitchell is the drilling contractor.

ATP 688P is jointly held by WestSide (50%) and QGC (50%).

ATP 688P coal seam gas drilling program

Well	Well Type	Spud Date	Finish Date	Current Status
Tilbrook # 8a	Exploration	16 April 2009	25 April	DST completed following gas shows. P&A as planned.
Tilbrook # 8b	Exploration	26 April 2009	2 May	DST completed following gas shows. P&A as planned.
Mount Saint Martin #1	Exploration Core hole	3 May 2009	20 May	In excess of 9m of net coal measured. DST's completed. Well suspended. Analysis and desorption continues.
Bald Hill #1	Exploration Core hole	21 May 2009	3 June	In excess of 8m of net coal measured. DST's completed. Well suspended. Analysis and desorption continues.
Tilbrook #8	Lateral L8b	21 May 2009	Expected 11 June	Drilled to a depth of 1,392 m (lateral)
	Lateral L8a	Expected 14 June 2009	Expected late June	Rig mobilising from Tilbrook #L8b.

About WestSide Corporation Ltd

WestSide Corporation Limited is listed on ASX (ASX code: WCL) and has interests in coal seam gas (CSG) projects in Queensland and Indonesia. WestSide has a 50% interest in ATP 688P and ATP 769P with QGC holding the other 50%.

WestSide is currently operating an appraisal program in ATP 769P (Paranui) and ATP 688P (Tilbrook, Mount Saint Martin and Bald Hill) sites in Queensland's Bowen Basin, and is also assessing the CSG potential of certain coal deposits in Indonesia through its relationship with PT Bumi Resources TBK, one of Indonesia's largest coal miners.

WestSide plans to release regular drilling reports through ASX for the duration of this drilling program. These reports will also be available on WestSide's website: www.westsidecorporation.com.
